► LIGHTWEIGHT MOBILITY. NO-COMPROMISE PERFORMANCE

Tired of trade-offs with lightweight laptops? At just 1.5 kg, the Toshiba Portégé R30 tips the scale like an ultra-portable, but packs a punch like a heavyweight. Toshiba put in many things left out of other lightweight computers, such as a DVD drive and a wide range of full-size ports. That's because we know you might just need your Ethernet port in the office, or USB 3.0 ports on the road. And with both VGA and HDMI, you'll be ready for all presentation settings. The Intel® Core™ processors give you great performance and save energy at the same time. But not only does the R30 pack a punch, it can take one, too. That's thanks to the magnesium chassis that has been reinforced with the proven Toshiba honeycomb internal structure and rigorously tested for drops and spills by independent German institute, TÜV Rheinland. The robust build is supplemented by an extensive list of manageability, security and investment-protection features designed to keep data safe, avoid downtime and lower cost of ownership. The lightweight, no-compromise Portégé® R30 will delight users and IT managers alike.
